THE PERFECT SINK FOR YOUR KITCHEN

Welcome to Reginox. Inside our catalogue you will discover a wide selection of stylish, high quality and practical sinks, taps, waste bins and accessories. Reginox is an European manufacturer based in Holland. We have a production capacity of almost a million sinks per year. With export to over 50 countries worldwide and sales offices in the United Kingdom, Germany and Singapore, Reginox is a truly worldwide company.

Our range of sinks includes a fantastic variety of stainless steel products including underbuild, integrated, inset, ceramic and granite sinks. Our integrated collection can be fitted in three different ways; underbuild, integrated or semi-integrated. These options make for a versatile and practical solution and a flexible product. Our stainless steel sinks all come with a lifetime warranty, full waste and fixing packs and the Reginox commitment to service and quality. Our ceramics offer superb finish and durability with a design that is equally at home within either a contemporary or traditional kitchen.

Some of our products such as our 'TEXAS' range are manufactured using world class leading production techniques that have never been used before in stainless steel sink production. This allows us to create outstanding designs, finish and styles that are truly innovative. Reginox uses high quality materials, modern techniques and first class quality control procedures to ensure that every product that leaves our factory is as close to perfection as possible. For further information on Reginox products, please contact our Sales Department or visit www.reginox.com

Product information

Mounting can be either undermount, integrated, semi-integrated or inset. The integrated or undermount options provide stunning results when fitted in solid surfaces. Whilst using an integrated sink as an inset also provides a different look. Whichever way you choose to fit your product you will be rewarded with a stunning and visually stimulating end result that will enhance your worktop and kitchen.

INTEGRATED sinks

For those customers choosing integrated sinks the flexible fitting system provides different opportunities to install your product.

Underbuild

Integrated

Semi integrated

INSET SINKS

Reginox sinks are easy to install and provide the customer with a superb finish with stylish detail to the top edges.

Fitting couldn't be easier, it's simply about making a cut-out in your worktop and mounting the sink with the clips provided. All sinks come with clear instructions but checking cut out measurements before proceeding is recommended.

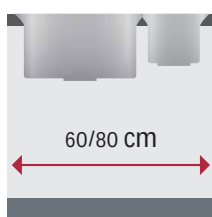

Inset

Cabinet size

The choice of your sink depends on the cabinet as this determines the available space. There are several cabinet sizes, 40 cm, 45 cm, 50 cm, 60 cm, 80 cm, 90 cm and 100 cm.

You only need to take into account the size of the bowl, not any drainer.

TECHNICAL INFORMATION

Reginox does have clear technical diagrams of all integrated sinks and custom made milling templates can be supplied. For computer controlled milling machines the necessary software is available on cd-rom and website.

Tips for maintenance

- To maintain your Reginox sink unit, we recommend that you use Reginox Inox Care regularly. Rub it in gently once a week and your sink will stay as good as new.
- Clean water is enough for daily maintenance, possibly with the addition of a mild detergent.
- You should polish only in the direction of the finish when using a scourer.

Why Reginox?

Dutch manufacturing since 1976

Reginox is located in Rijssen in the eastern part of the Netherlands. It is here that all our sinks are developed and manufactured. With ultra-modern machinery, we produce more than 150 different sinks for the national and international kitchen markets. Thanks to its constant innovation and responsible production practices, and with an eye for people and the environment, Reginox occupies a leading position in the global market.

DESIGN SINCE 1976

Reginox knows the value of design and is able to create the most beautiful stainless steel designs. Based on the internationally renowned term 'Dutch Design', we repeatedly succeed in being innovative – by paying attention to detail, with an eye for precision and always the right balance between functionality and design. Every sink is a (wonderful) example of custom design.

Quality since 1976

Each Reginox sink is manufactured with the most modern deep drawing techniques and the best stainless steel. The core value of our brand is quality, which we safeguard throughout the entire process: from the purchase of raw materials to the manufacturing stage, and from transport up to and including follow-up. This way we make it as easy as possible for you: if it's from Reginox, you can rely on it.

With an eye for people and the environment since 1976

Corporate Social Responsibility involves manufacturing with an eye for people, the environment and society. Reginox is FSC-certified and 70% of our sinks are made from recycled steel. We provide a pleasant and safe working environment for our staff members and help protect the environment through raw-materials control and energy savings. We regard this as our obligation to the generations to come.

Experience since 1976

With more than 35 years experience in the kitchen market, Reginox stands for successful products. We know what our consumers want and what professionals expect – and alertly anticipate their needs with innovative, quality products. Reginox combines experience with continuity. We have always been there for you in the past and we will always be there for you in the future.

Lifetime warranty

All Reginox sinks are supplied with a lifetime warranty.

Regi Color

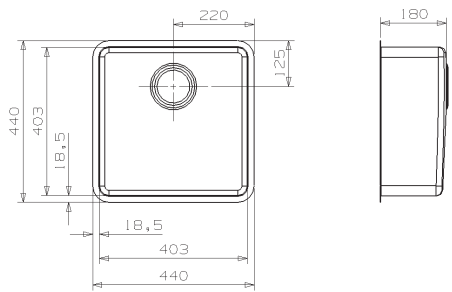

An exciting new trend in the range of Kitchen sinks & Washbasins is the use of color. Reginox introduces color coated a completely new product range which responds to this trend. Regi-Color is the family name for sinks made of stainless steel. By applying an advanced technique, Reginox has produced superb colored sink units which have a luxury metallic & pearlescent finish.

Regi-Color has been extensively tested for chemical and abrasion resistance, and is available in 3 colors, Arctic White, Sahara Sand and Midnight Sky for a selected range of sinks.

Ohio 40 x 40

Regi-granite

It attracts the eye, inviting to the touch.

Aesthetical impact, adaptability to steel, Granite functionality and practicality.

Granite is given by the union of natural granite and acrylic resin and has the best quality: high resistance of granite to high temperatures, to impacts and to the most violent shocks. Appearance like a natural stone.

Granite metallic stars: the uniqueness of this product is that have been added the metal particles, making the product with a brilliant and shining finish. The target is to obtain special “metallic star effects”.

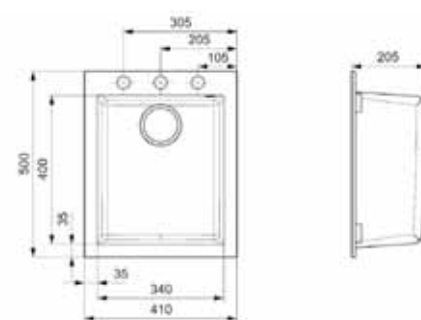

Antibacterial protection

The Regi-Granite sink has an antibacterial protection, which has an adequate antibacterial coverage of the mass. In this way the bacterial organisms are repelled. The mass is in fact enriched with silver ions that inhibit the establishment and growth of bacteria.

50

The universal solution for 40 cm cabinets

All models are equipped with the cam opening and the antiblocking system protecting the door. After it is taken out of the track, the bin can easily be moved. In this way, the inner side of the door and the bin are easy to clean.

The cam lifts the lid automatically when opening the door.

Clean & Care collection

Clean & Care from Reginox is a purpose designed range of products aimed specifically at the commercial market where stainless steel sinks are required. Typical applications would include areas such as medical, public sector, dental, bars, nightclubs, restaurant/cafes, shopfitting, public toilet facilities, service stations and many other commercial, public or retail areas.

All made in our own manufacturing plant in Holland the Clean & Care range consists of stainless steel sinks either with or without overflow (MOQ and delivery time may apply), bathroom/washroom vanity bowls.

All Clean & Care sinks come with waste, clips, seals and fitting packs and also carry comprehensive guarantees.

Standard Clean & Care range

The following products are available without overflow. Suitable for most commercial applications, all products are supplied with fixing clips, waste and plumbing kits.

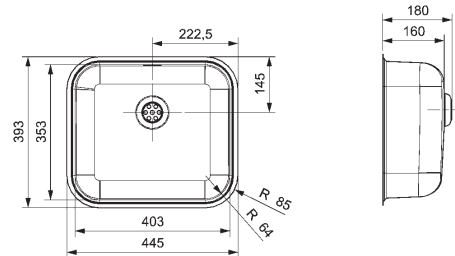

316 steel

Reginox can also deliver several sinks in 316 steel. 316 Steel is corrosion and aggressive chemicals resistant. Standard 316 steel range IB4040 and IB5040. Other models available upon request.

Stainless steel worktops for Healthcare

Reginox offers stainless steel worktops made from steel quality 304 or 316 suitable for healthcare purposes. Stainless steel is easy to clean and very durable. In case the worktops are used in an environment with chloride or other acids, we recommend to have the worktop made from stainless steel quality 316. This steel is produced to withstand sour, salt and chloride acids. These worktops are often used in hospitals, dentists / doctors offices, public washrooms, pubs, bars, gas stations, shops, etc.

Please contact us for more information via info@reginox.com or tel. +31 (0)548 535 635

Reginox stainless steel quality AISI 304 18/10

PITT by Reginox

An exclusive line of fully integrated gas burners for your worktop.

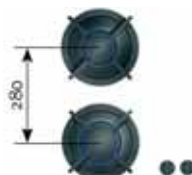

Highlights

- 29 different burner combinations
- Instant ignition by electricity connection or battery (has to be mentioned with order)
- 30% higher burner efficiency than conventional gas burners due to oxygen flow from above to the burners, instead of underneath inside the cabinet
- Heatshield made from stainless steel with double emaille layer
- Large space between burners: standard 280mm up to 370mm for XL versions
- Suitable for fixed gas lines and bottle gas (has to be mentioned with order)
- Suitable for heat conductable worktops like: Quartz, concrete, Terrazzo, glass, ceramic, Corian, LG Hi-Macs or stainless steel worktops

Manhattan

The Manhattan island is the pinnacle of modern kitchen design. It looks great and is supremely functional with several modules, including: wooden cutting board set, full stainless steel knife set, oil/wine bottle holders, food prep containers, dish drainer, glass drainer, colander and soap dispenser modules.

The Manhattan models are available in 3 lengths: 70cm (fitting 2 modules), 100cm (for 3 modules) and 130cm (for 4 modules) and are ideal for installation in combination with a Reginox sink.

EC Declaration of Conformity

The manufacturer
Reginox bv
Noordermorssingel 2
NL-7461 JN Rijssen

declares in accordance with paragraph 1.4 of the Buildings Decree
(translation of the Building Products Directive 89/106/EEC) that

Reginox stainless steel sinks
manufactured at its plant in Rijssen

comply with the stipulations as specified in NEN-EN 13310
Kitchen sinks – functional requirements and test methods

The stainless steel sinks in question are intended for household use.

Rijssen: 27-05-2009

Technical Director
W. ter Steege

CERTIFICATE OF APPROVAL

This is to certify that the Quality Management System of:

**Reginox B.V.
Noordermorssingel 2
7461 JN Rijssen
The Netherlands**

has been approved by Lloyd's Register Quality Assurance
to the following Quality Management System Standard:

ISO 9001 : 2008

The Quality Management System is applicable to:

**The production and the designs of stainless steel
sinks and stainless steel worktops. The production of
synthetic worktops and synthetic desks. The supply
of synthetic worktops, granite sinks and accessories.**

Approval Certificate No: RQA650960	Original Approval	:	1 July 1996
	Current Certificate	:	1 July 2014
	Certificate Expiry	:	30 June 2017

Issued by: Lloyd's Register Nederland B.V.

K.P. van der Mandelelaan 41a, 3062 MB Rotterdam, The Netherlands
This approval is carried out in accordance with the LRQA assessment and certification procedures and monitored by LRQA.

Delivery and warranty provisions for Reginox - stainless steel - products:

All Reginox sinks are supplied with a lifetime warranty! This warranty doesn't cover waste kits, pop ups, connections, strainer, basket strainer and kitchen accessories. Within the first 6 months of the warranty period, travelling time and call-out charges for servicing, insofar as these relate to resolving complaints under these warranty provisions, and the costs of sending parts, will not be invoiced.

1. Demonstrable defects in material and workmanship are entirely covered by this warranty, provided that they are notified to us within the stated time limit. The solution is at our discretion: either by a repair or a replacement.
2. Damage caused by overheating of electrical or gas equipment, water leaks, fumes, scratches, etc. as well as normal wear and tear are not covered by this warranty.
3. Stains, deposits, etc. which are the consequence of using corrosive substances such as soldering fluid, paint/stripper/brush cleaners, metal grindings, cement, sink unblockers, silver polish, developing and fixing substances, etc. are not covered by this warranty.
4. Sheeting subsequently modified by third parties, by creating cooking hob cut-outs, tap holes, etc., are not covered under warranty.
5. A claim under warranty does not extend claims for extension of the warranty period or for newly delivered parts or the repairs that are carried out.
6. All replaced parts or old steel sheeting which has been replaced are the property of Reginox and are therefore invoiced and only credited after return.
7. Claims under warranty and subsequent entitlement to repairs or replacement will only be dealt with if the complaint has first been personally investigated and reported by the buyer. No other claims or rights of any kind whatsoever shall ever be derived from this warranty.
8. All goods must be checked prior to assembly and/or installation to make sure that they have been manufactured correctly, e.g. dimensions and cut-outs, and to make sure that they are not damaged.
9. Only invoices from buyers deriving from complaints etc. will be honoured, provided that there has been express prior consultation on the matter and agreement has been reached. (set down content of agreement in writing)
10. When Reginox products are delivered, the recipient must check that the packaging is not damaged immediately (within 48 hours) (dents, scratches, etc. and if necessary, this must be stated on the delivery note).
11. Our confirmations also serve as work orders for our production. It is therefore essential to check these because if there is no quick response, it will no longer be possible to accept any claim on the grounds of incorrect manufacture.
12. In addition to these provisions, the General Terms and Conditions of Delivery and Payment for the Metal Industry issued by the Koninklijke Metaalunie, filed with the Registry of Rotterdam District Court on 1 January 2008, shall apply.
